

CRYPTORESQUE

Making a difference

Official White Paper

CryptoRescue.org

Introduction

CryptoRescue is here to make a difference for animals and the organization that take care of them. We have volunteered with some of these organizations for several years and have seen the struggle they have gone through financially and emotionally and we want to do more than donate our time. We have been involved in the crypto world now for about a year and have been GPU mining for about 4 months. The people we have met through the crypto world have been compassionate and caring and want to do the right thing. After see people spending money on coins that have no use or have no real-world value we concluded that maybe we can give them a reason to invest in a coin that has a real-world use and help animals and the organizations that are working hard saving these animals. This will allow the investors to make money while also giving to a great cause.

Who are the people behind CryptoRescue?

First let's talk about who we are not. We are not CEO's of your fortune 500 company, we are not bored millionaires, we are not individuals that make \$100,000 + a year and we are not here to have a "get rich fast program". We are not those people that are going to try and get our faces in the news or become famous, (but would love for the coin to do this) We are individuals that are attending colleges, we are individuals that are working 40-60 hour a week jobs to support our families. We are individuals that care about what we are doing and how we are going to do it. We are people who will always do the right thing. We are people who care about these animals and want to help them survive. No company, no sponsors, no donation has been made to the developers of CryptoRescue, so we are not in debt to anyone except the animals and organizations that need our help.

We are looking to sponsor animals in shelters, adoption homes and in pounds.

When sponsoring these animals, we are wanting to help with board and shelter, veterinary expenses, food, toys and needs specific to that animal. Even though we are not adopting, we (CPR and the donators) still receive the joy of knowing we helped provide care for the animal that have been sponsor. These sponsored animals will be posted on our website with the history and updates of the sponsored animal and how much we donated to be transparent with all donations that CryptoRescue receives.

Assisting with adoption fees and adoption events

There are lot of people out there that would love to adopt a pet to join their families but cannot afford it. In general, the adoption fee could be between \$200-\$250. This does not include a possible deposit for the pet to be neutered/sprayed which could be around \$100. CryptoRescue want to take care of those fees so these animals can find a good loving home. We want to help these families to take a pet home to their children, girlfriend/boyfriend, wife/husband. Nothing brings a smile to your face then a surprised adopted pet coming to its new home and meeting their new families. We want to be a part of that joyful moment.

Participate and donate to Pets for Patriots and Pets for Vets programs

Adopted animals for years now have helped veterans across the world help deal with the issues they bring home from wars, battles and/or situations that they have been through. It has been proven that pets help these veteran deal with and work through depression. These pets help veterans build trust again, get more active, assist with the transition from military to civilian life and fell the companionship that they were used to while serving in the military. On www.smithsonianmag.com it says, “New research finds that “man’s best friend” could be lifesavers for veterans of the wars in Iraq and Afghanistan”.

CryptoRescue wants to be a part of this research and donate to the cause. If you want to read more, go to:

Participating and promoting adoption events

Holding an adoption event is not free. Yes, they do get volunteers, but it is not enough. We want to assist with these events. They need tents, water, leashes, advertising and location to hold the event. We can help with all these items. These are the places we will want to make

CryptoRescue shirts, hats and other items available for individuals to buy where all profits go to the organization holding the event. If you have never volunteered at one of these events, you should. The joy you have when you see someone adopt a pet or the happiness the pet shows when they are getting in the car of their new family members heading to their new homes, is just so satisfying.

Participating and donating to stopping puppy mills

What is a puppy mill? It is a dog breeding operation in which the health of the dogs is disregarded to maintain a low overhead and maximize profits.

According to the Humane Society of the United States, there are an estimated 10,000 licensed and unlicensed puppy mills. This is just in the United States! These puppy mills are not regulated so they are not inspected like shelters, pounds and rescue organizations are. We are determined to stop these puppy mills and assist in finding the right homes for these animals. CryptoRescue wants to be a part of the team that saves these animals by donating and helping financially and ultimately, we want to be ones that go out and physically help in this process.
